Frequencies for Your Life

HealAdvisor Analyse App Manual

Note International:

The Individualized Microcurrent Frequency (IMF) programs of the Healy are not medical applications. They are not intended to cure, treat, mitigate, diagnose or prevent disease, have not been reviewed by a notified body and are not part of a conformity assessment procedure under the MDD/MDR. The information on these pages is for reference and educational purposes only. It should not be treated as a substitute for professional medical advice, diagnosis or treatment. You should always seek such advice from a qualified medical professional.

Note USA:

Emerging science supports the use of Information Field analysis and optimizations as goals or affirmations. Information Field analysis and optimizations are not intended as medical advice and are not substitutes for examination or treatment by a medical doctor or other healthcare professional.

Healy provides personalized information that can help users understand how to improve their level of wellbeing, vitality and awareness. Healy information should not be the only information relied on to make legal, business, medical or personal relationship decisions, and the manufacturer specifically disclaims any responsibility for user actions based on Healy information.

Foreword

In this manual the different programs and functions of the HealAdvisor Analyse App are explained.

To receive regular information about program updates, new databases and important announcements, please stay in touch with us via email.

Note: Before reading this manual, we would like to ask you to read the instructions for use. There you will find the safety instructions, all aspects concerning the use of Healy, technical details and storage instructions.

We wish you all the best with your Healy.

Introduction

You can download the HealAdvisor Analyse App free of charge from the Apple App Store and the Google Play Store. To start the download for the iPhone, please click on the “Download Cloud” icon in the upper right corner, see **Figure 0.1**, and for Android smartphones please click on the “Install” button, see **Figure 0.2**.

Once the download and installation of the HealAdvisor Analyse App is successfully completed, start the HealAdvisor Analyse App, **Figure 0.3**. To connect your Healy to your smartphone, click on the button “I have a Healy”, **Figure 0.4**. For more information about the Healy devices, click on the link “I am interested in a Healy”, **Figure 0.7**. To connect to Healy, Bluetooth and Location Sharing/GPS must be activated on your smartphone and Healy must be switched on. If Bluetooth is deactivated, you will receive an error message, **Figure 0.5**. After successful Bluetooth activation, all Healy devices in your vicinity are listed. Select your device from the list, **Figure 0.6**.

Once you are connected to your Healy, you can login into the App with the E-mail address and password you used to register on the Healy website, even though you never used the HealAdvisor Analyse App. There is no registration process, as we implemented the SSO function (Single Sign-On), allowing you to sign into all our apps and platforms with just your Healy World registration data, see **Figure 0.8**.

After successful login, you can synchronize the databases from the Cloud by clicking “Synchronize Now”.

Note: We recommend a stable and fast WiFi connection for synchronization, as the databases are a few hundred megabytes in size.

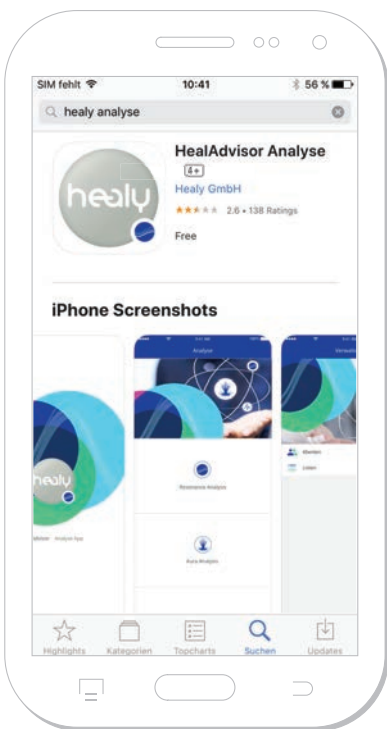

Figure 0.1: Download the HealAdvisor Analyse App from the Apple App Store

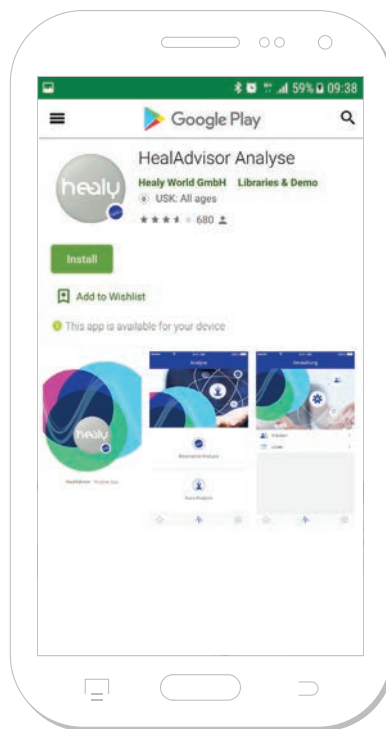

Figure 0.2: Download the HealAdvisor Analyse App from the Google Play Store

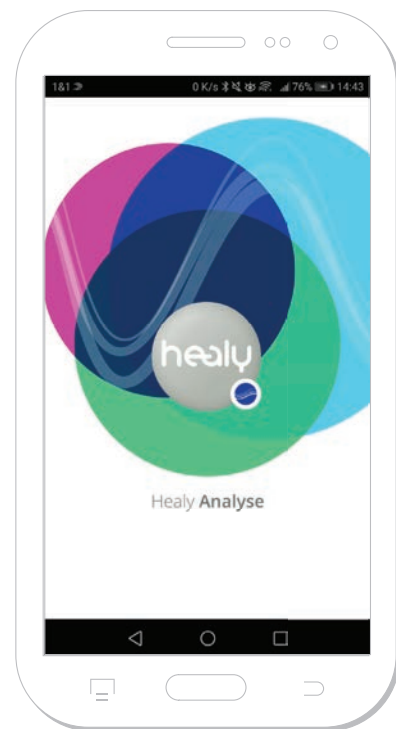

Figure 0.3: Start the HealAdvisor Analyse App

After synchronizing with the Cloud you can fully use the HealAdvisor Analyse App and create clients.

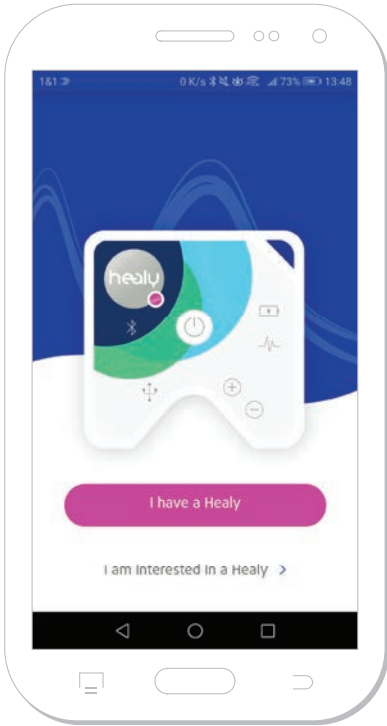

Figure 0.4: Connect to Healy, or visit the Healy website for more information

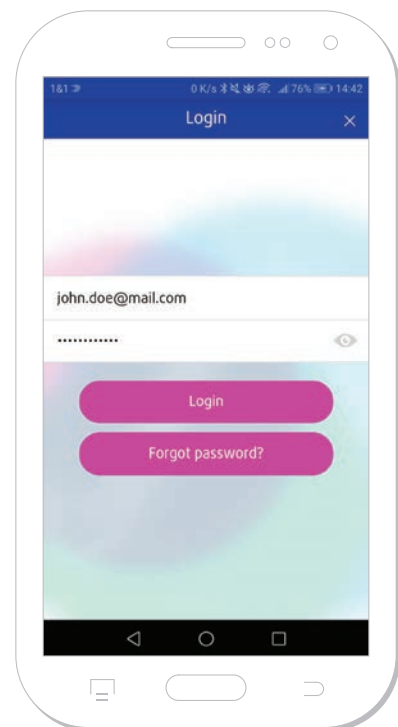

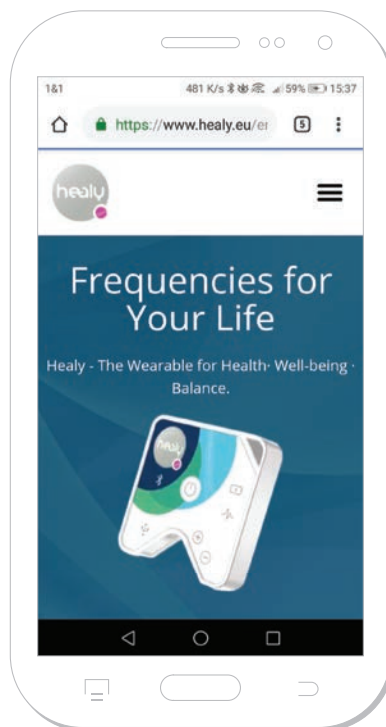

Figure 0.8: Login after successful Cloud account creation

1 The Home Menu

By tapping on the house icon in the lower left corner of the HealAdvisor Analyse App, you can access the home menu. Here you can access the “Clients” (refers to anyone, including yourself, and any entity whose information is stored in the App or the Holistic Health Cloud) and “Lists” categories, see **Figure 1.1**.

1.1 Client Menu

In the Client menu you can create new clients or manage, search and edit existing clients, see **Figure 1.1.1**.

1.1.1 Create New Client

If you click on the “Create new client” icon, a pop-up menu opens in which you must select a client type. You can choose between the following client types: Person, Animal, Plant, Company, Building, Vehicle, Group and Other **Figure 1.1.1.1**. Then you enter the client data, **Figure 1.1.1.2**.

In the client data form you have the possibility to enter the following data (using the client type Person as an example, see table below):

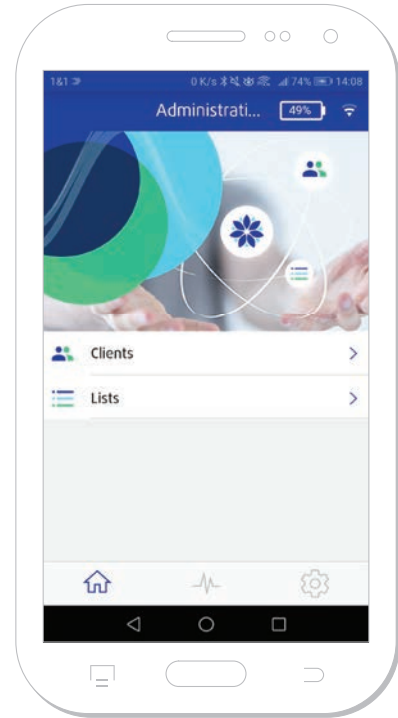

Figure 1.1: Home menu

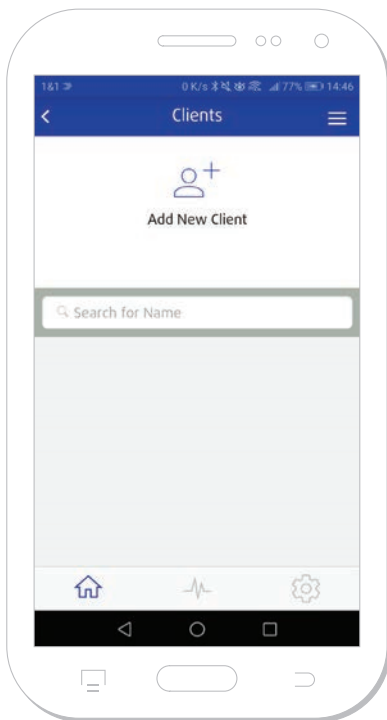

Figure 1.1.1: Client menu

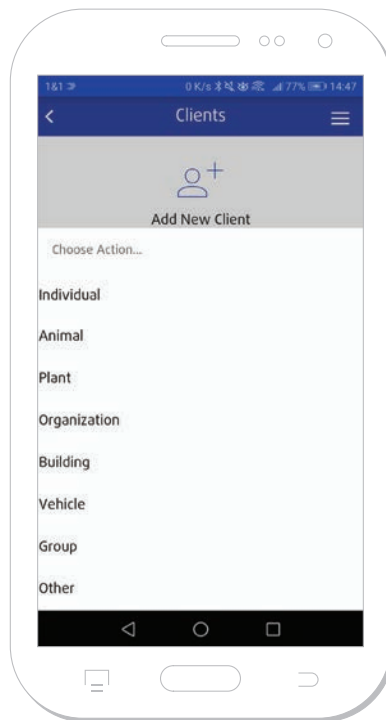

Figure 1.1.1.1: Select client type

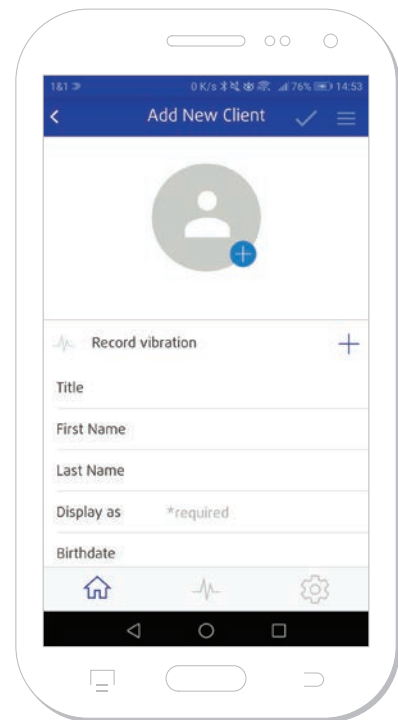

Figure 1.1.1.2: Create new client

Menu items: Client data	Description
Add client image	To enter a client picture, tap on the silhouette, see Figure 1.1.1.2 , and either take a photo directly with your mobile phone camera using the "Take photo" option or select a photo from your photo gallery by tapping on the "Select from photo album" option. For this you have to grant the access permission.
Record vibration	In this submenu you can record the specific vibration pattern of the respective client, see Figure 1.1.1.3 . Hold your Healy in your right hand and start the recording by tapping the button "Record vibration". If your Healy is correctly connected, the vibration will now be recorded, see Figure 1.1.1.4 .
Title	You can enter the client's title here.
First name	Enter the client's first name here.
Last name	Enter the client's last name here.
Display as	Enter the name to be displayed in the client menu here (this field is automatically filled with the first name and last name). This field is the only mandatory field, all other information is optional, see Figure 1.1.1.2
Birth date	You can enter the date of birth (year, month, day) here
Birth place	You can enter the place of birth here
Male/Female	Here you can select the gender of the client: Gender "Male" (M) or "Female" (F)
E-mail	You can enter the client's e-mail address here.
Telephone	You can enter the client's phone number here.
Address	You can enter the client's address data here. You can enter the following information: Street and house number, city, post code, country, see Figure 1.1.1.5
Option field	Synchronize client data and associated analysis data with the Cloud. Important: If you are entering information about another person, you must have that person's prior permission to send their data to the Cloud; if a minor, that person's parent or guardian must give permission.

To save all the client data, tap on the check mark in the upper right corner of the screen, see **Figure 1.1.1.6**. After saving, a pop-up appears: "Should this client be synchronized to the Cloud? This requires permission from the client." YES/NO

- If you tap "YES", the client data will be synchronized to the cloud and the client data will be saved.
- If you tap "NO", the client data will be saved.

After saving, another pop-up appears with the message "The client has been saved: Do you now want to start an analysis: YES/NO

- If you tap "YES", you switch to the "Analysis Menu".
- If you tap "NO", you remain in the client menu.

If the client has been saved, the client actions menu, consisting of three horizontal bars, is activated in the upper right corner next to the check mark, see **Figure 1.1.1.7**.

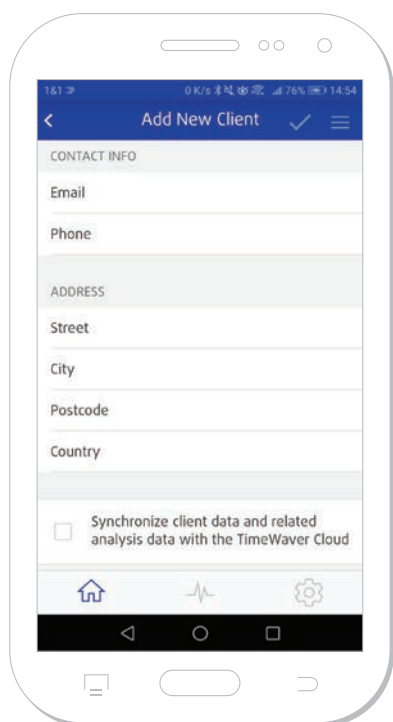

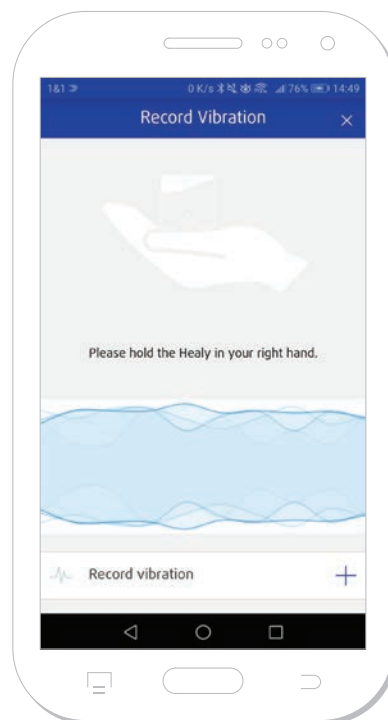

Figure 1.1.1.5: Enter the client's
address data

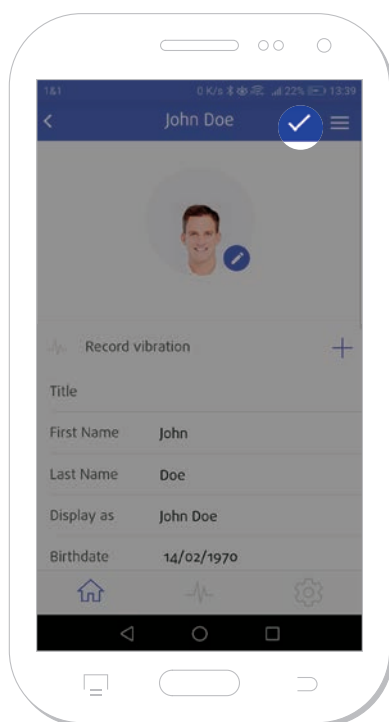

Figure 1.1.1.6: Saving client data

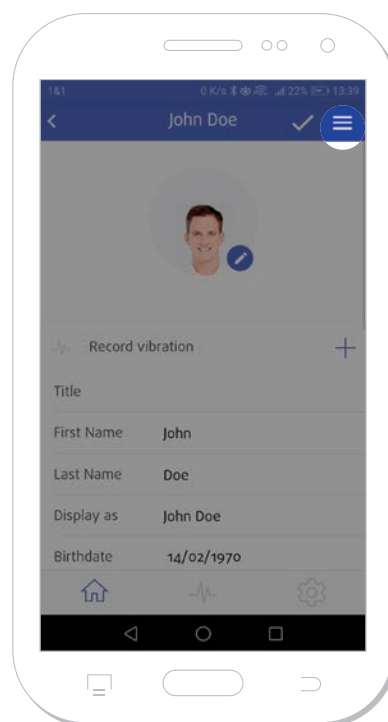

Figure 1.1.1.7: Create new client:
Manage documents

1.1.1.1 Client Actions Menu

You can perform the following actions in the Client actions menu, see **Figure 1.1.1.1.1**.

Menu item	Description
View lists	In the "View lists" menu you can open and view active and deactivated client's lists, see Figure 1.1.1.1.2 . Active lists are lists created with the HealAdvisor Analyse App. Deactivated lists are lists with already expired transmission parameters. Lists which are marked blue are lists which are created after a Resonance analysis. Red lists refer to an Aura analysis, green lists to the Coaching analysis.
Back to clients	The "Back to clients" button takes you back to the main client menu.
Save and Analyze	With the "Save and Analyze" button you can access the analysis menu after saving the client data.
Remove client	With the "Remove client " button you can delete clients that have already been created.
Cancel	With the "Cancel " button you return to the client menu.

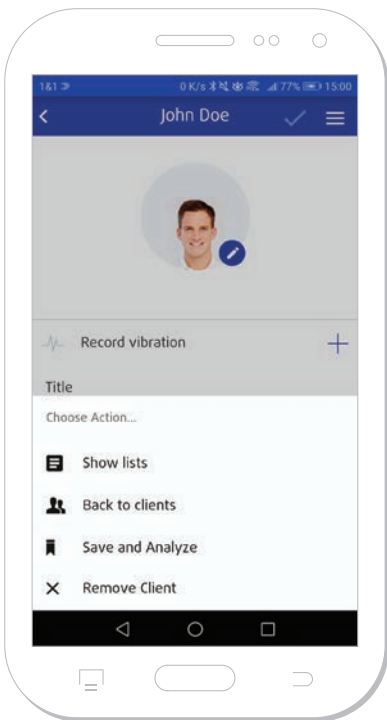

Figure 1.1.1.1.1: Client actions menu

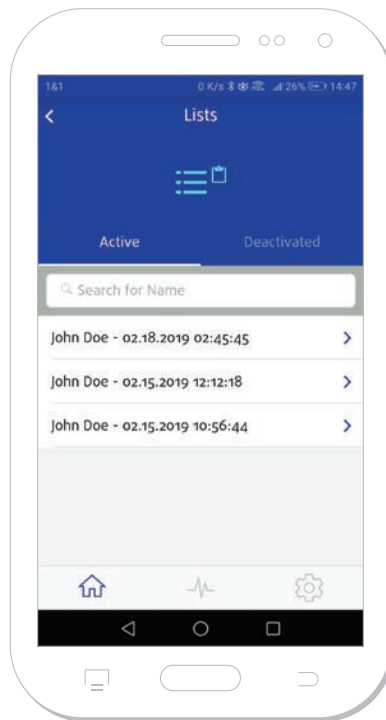

Figure 1.1.1.1.2: View lists

1.1.2 Delete Client

You can delete previously created clients by swiping the corresponding client to the left. A menu will then appear with two buttons: “Delete” or “Edit”, see **Figure 1.1.2.1**.

1.1.3 Search for Name

In the menu item “Search for name” you can search for clients, see **Figure 1.1.3.1**.

1.1.4 Client Options Menu

Under the “Client options menu” at the top right of the screen, consisting of three horizontal bars, you can import clients from the address book of your smartphone using the “Import from Address Book” button, see **Figure 1.1.4.1**. At this point the HealAdvisor Analyse App will ask if it is allowed to access your contacts.

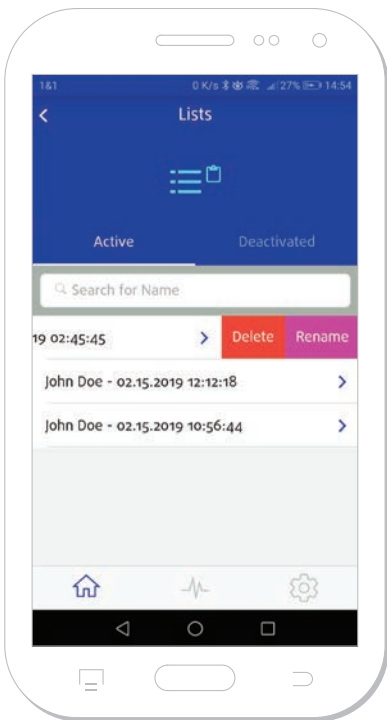

Figure 1.1.2.1: Edit or delete client

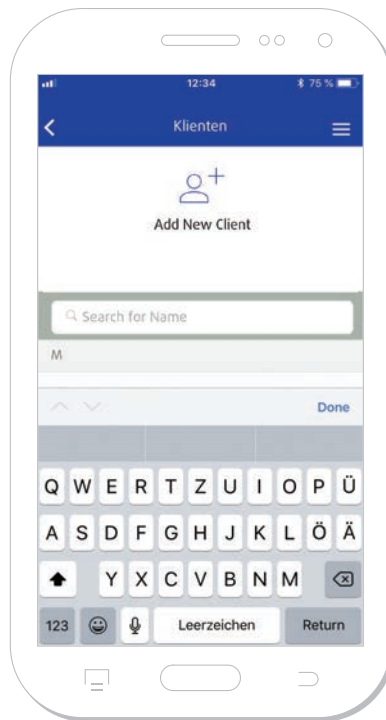

Figure 1.1.3.1: Search for name

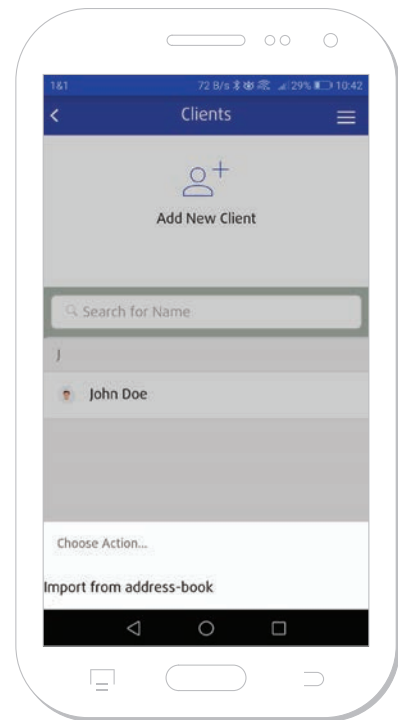

Figure 1.1.4.1: Additional options in the client menu

1.2 List Menu

The "List menu" displays active and deactivated lists of clients. All lists are sorted chronologically by creation date, see **Figure 1.2.1**. Lists from the "Resonance Analysis" are highlighted in blue. Lists from the "Aura Analysis" are highlighted in red.

To delete or rename lists, swipe over a list to the left. The two buttons "Delete" and "Rename" are then displayed, see **Figure 1.2.2**.

The determined list entries of the analysis lists show the parameters relevance, intensity and power, which can be used to interpret the list. The relevance (a numerical value of -100 % to +100 % is possible) indicates how important an entry currently is for the client. The intensity (a numerical value of 1-10 is possible) shows how present the mentioned entry is in the client's consciousness and can therefore provide orientation as to the extent to which the client is willing to confront the topic. The potency is a further weighting factor (values D, C and LM possible).

1.2.1 List Options

Using the "Actions" button (see **Figure 1.2.1.1**) and the "Add manually" menu item, further entries can be added manually to a list at any time, see **Figure 1.3.1.2**. A list entry and individual items of the list entry can be edited, supplemented or deleted using the "Pen icon" and the red "X icon", see **Figure 1.2.1.3**. You can also export the list as a PDF file, see **Figure 1.2.1.4**.

In the top right menu there is a filter and sort function, displayed as 4 vertical bars, see **Figure 1.2.1.5**. List entries can be filtered according to Intensity, Potency, Present state and Desired state and also sorted according to Relevance, Potency and Intensity in the top or bottom view.

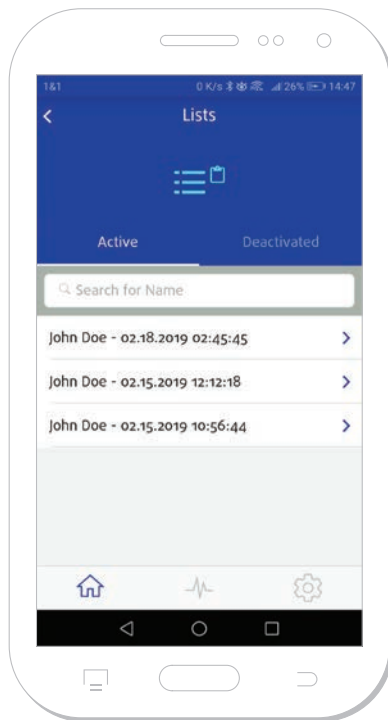

Figure 1.2.1: Active client lists

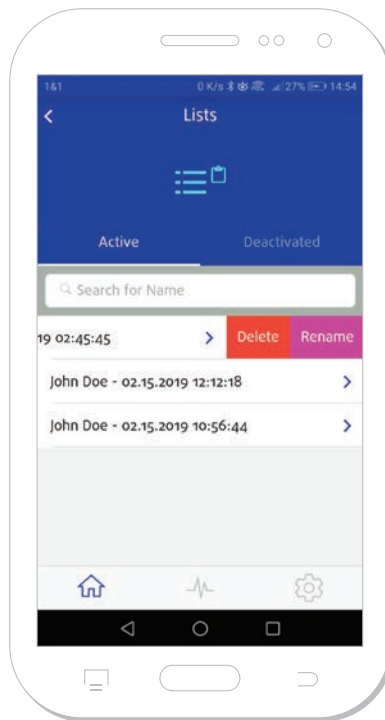

Figure 1.2.2: Delete and rename lists

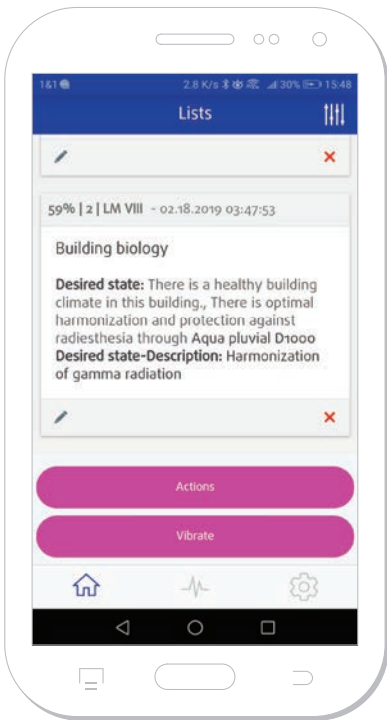

Figure 1.2.1.1: Open actions menu

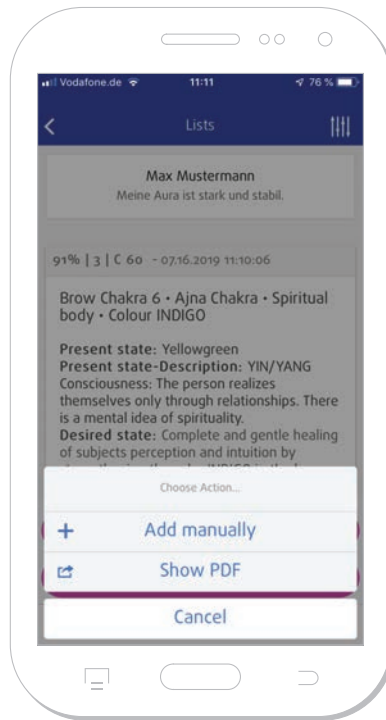

Figure 1.2.1.2: Actions menu for client lists

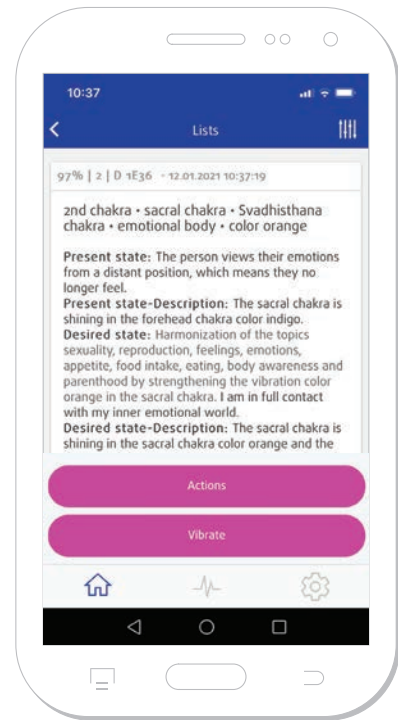

Figure 1.2.1.3: Edit, add to or delete list entries

Figure 1.2.1.4: Export the list as PDF

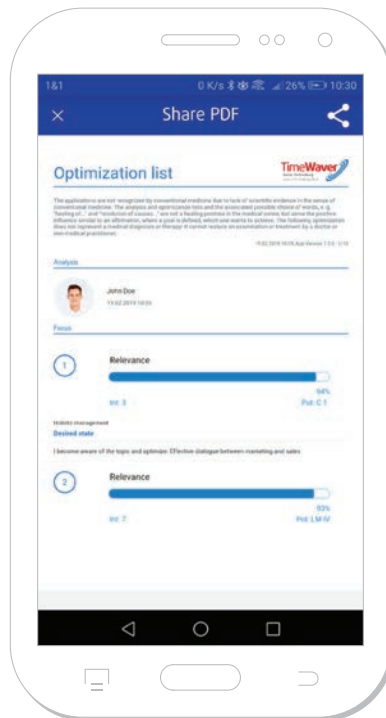

Figure 1.2.1.5: Filter and sort function of client lists

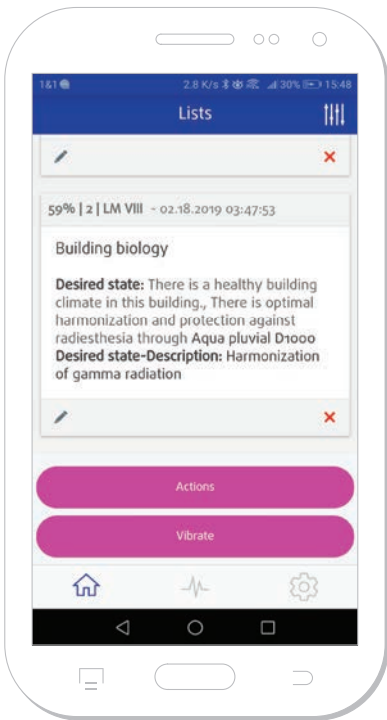

Figure 1.2.2.1: Vibrate client lists

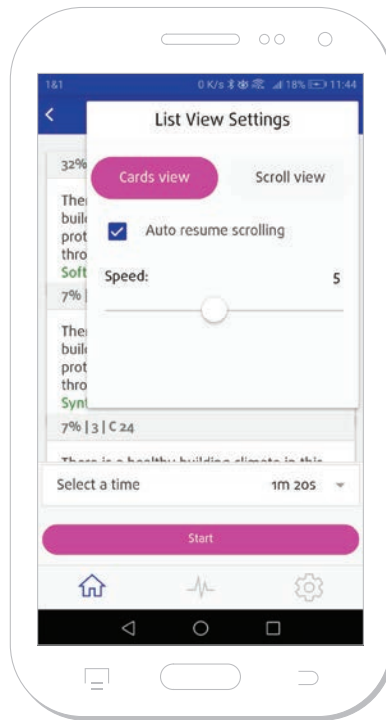

Figure 1.2.2.2: List view settings

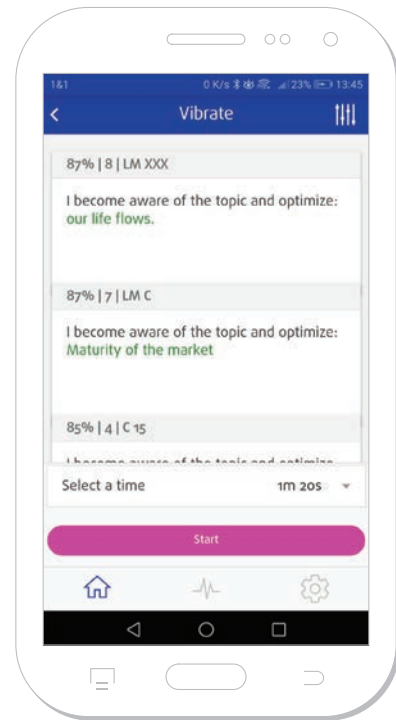

Figure 1.2.2.3: View during list vibration: Card view

1.2.2 Vibration Menu

If you tap the button “Vibrate” in a list, see **Figure 1.2.2.1**, you enter the “Vibrate” section.

In the menu at the top right, you can choose between different modes for the view during vibration, see **Figure 1.2.2.2**.

In the card view, the sent list entries are displayed one after the other, where you can set the speed of the image change, see **Figure 1.2.2.2**. In the scroll view, the list runs continuously from bottom to top, see **Figure 1.2.2.4**.

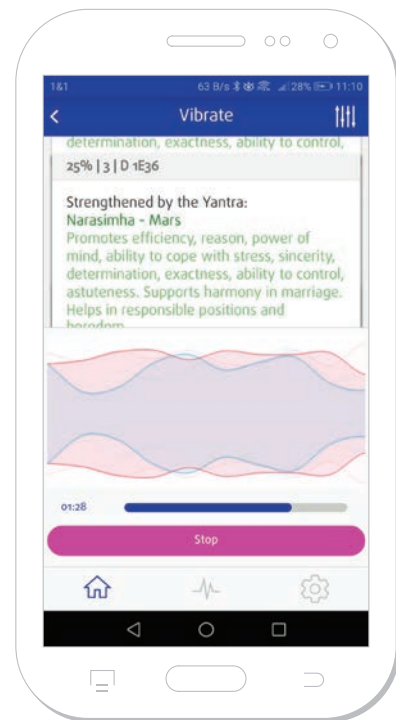

Figure 1.2.2.4: Scroll view during vibration

With the menu item "Select transmission duration" you can set the transmission duration of the list, see **Figure 1.2.2.5**. The following options can be selected:

890 z	17 s 875 z	5 m 59 s	2 h 12 s 590 z
1 s 884 z	37 s 843 z	12 m 40 s	4 h 14 m 27 s
3 s 989 z	1 m 20 s	26 m 49 s	8 h 58 m 40 s
8 s 444 z	2 m 49 s 600 z	56 m 46 s 514 z	Manual

With the manual transmission duration, the parameters days, hours, minutes and seconds can be set individually, see **Figure 1.3.2.6**.

The transmission parameters are calculated according to the golden ratio and should thus achieve their optimal effect in the client's field. According to our experience, a transmission time of 12 minutes or more is generally recommended when transmitting to massive objects such as healing stones and real estate.

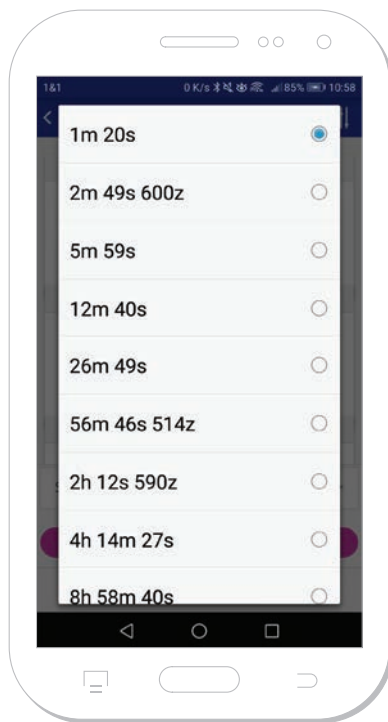

Figure 1.2.2.5: List transmission parameters

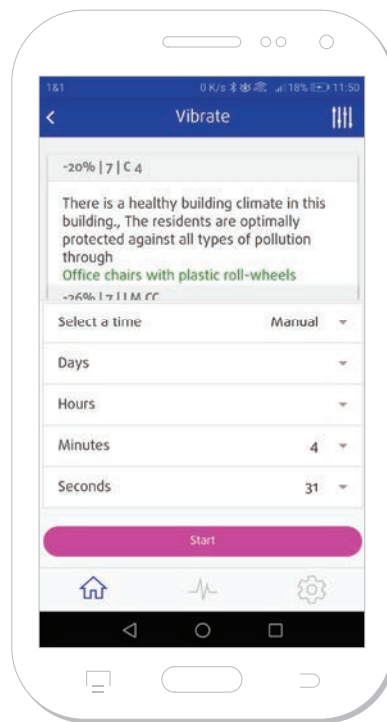

Figure 1.3.2.6: Manual setting of transmission parameters

2 Analysis Menu

The analysis menu contains all analysis modules that are enabled for your HealAdvisor Analyse App, see **Figure 2.1**. All the modules are designed to perform analyses in the information field of your clients. Analysis results are then automatically saved and can be found in the home menu under "Lists".

2.1 Resonance Module

In the Resonance Analysis module, you can perform an analysis in the information field for all created clients, with which you can determine what the client is currently resonating with the most.

For the analysis you must be connected to your Healy. Please select an existing client first, see **Figure 2.1.1**.

In the resonance analysis menu you will find a pre-formulated focus sentence "With what do I have the greatest resonance now?", which cannot be changed. Via "Continue with database selection" you reach the database menu, see **Figure 2.1.2**. In addition to Healy programmes, the selection includes databases such as:

- Australian Bush Flowers
- Alaskan Gemstone Elixirs
- Bach flowers
- I Ching
- Schuessler Salts

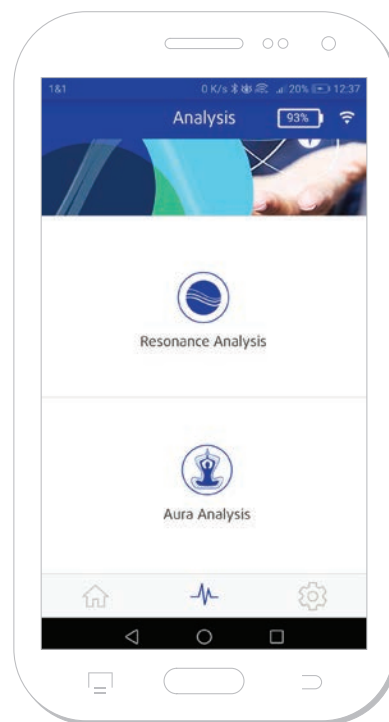

Figure 2.1: Analysis menu with two analysis modes

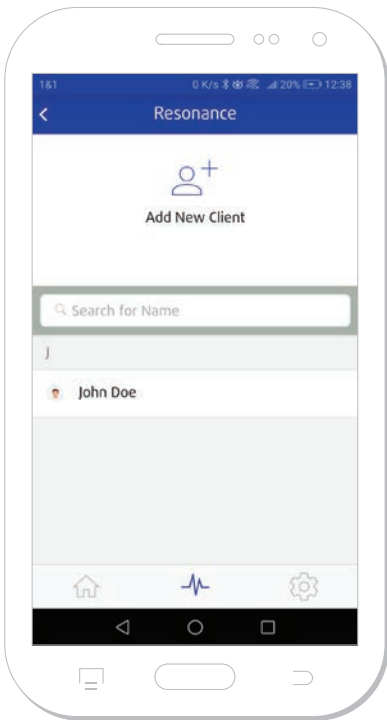

Figure 2.1.1: Client list in the Resonance Analysis menu

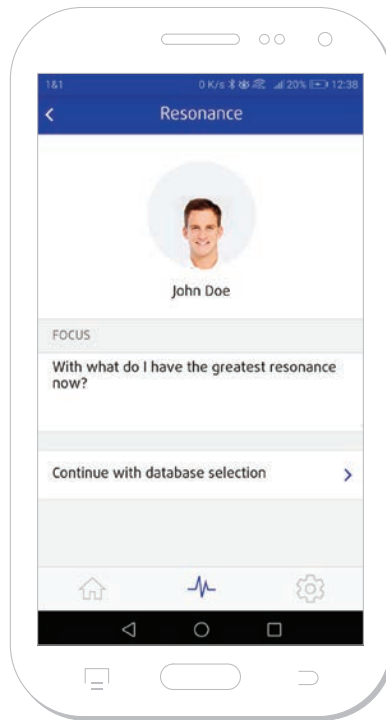

Figure 2.1.2: Focus set for Resonance analysis

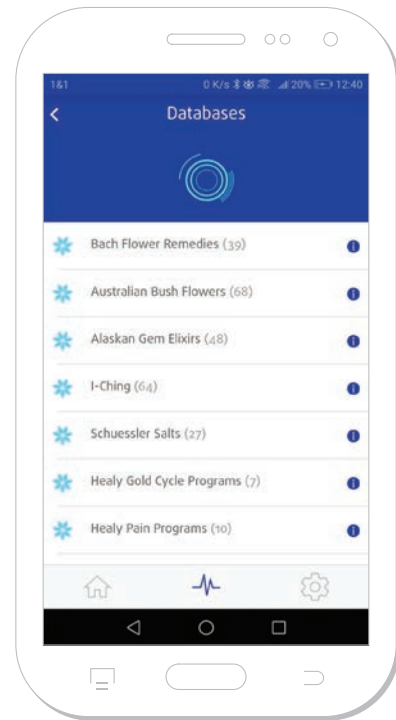

Figure 2.1.3: Resonance analysis databases

For a detailed list of the individual database entries tap on the blue “i” icon at the end of the respective category, see **Figure 2.1.3**. Individual database entries cannot be selected. Confirm by clicking on the “checkmark” icon at the top right, see **Figure 2.1.4**, to select the category and return to the Resonance Analysis menu. The selected category will now be displayed. By tapping on the “Pen” symbol you can select another category, see **Figure 2.1.5**.

Now the analysis can be carried out by placing a finger onto the display, see **Figure 2.1.6**. You can also carry out an analysis for a client by “neutral focusing” on him.

After the analysis, the analysis list is displayed with the five entries that have the greatest resonance with the client, see **Figure 2.1.7**.

From the analysis list you can either create a PDF, which you can share with others, or you can add the information from the list to the client’s field. Alternatively, you can also add positive information to an object.

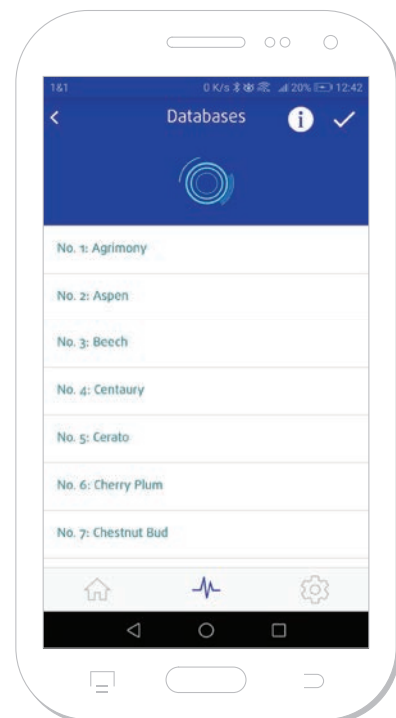

Figure 2.1.4: Database entries of the respective database

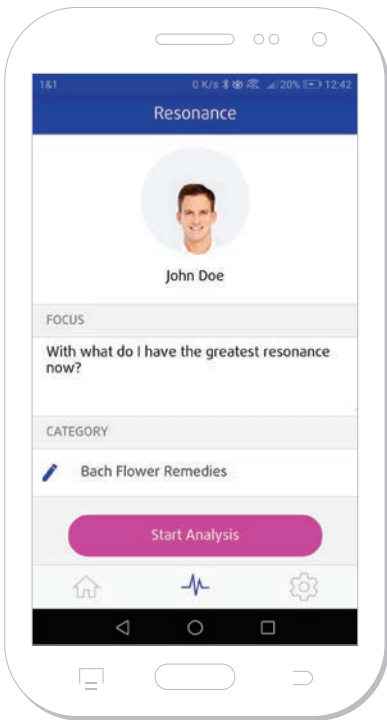

Figure 2.1.5: Focus set for Resonance analysis

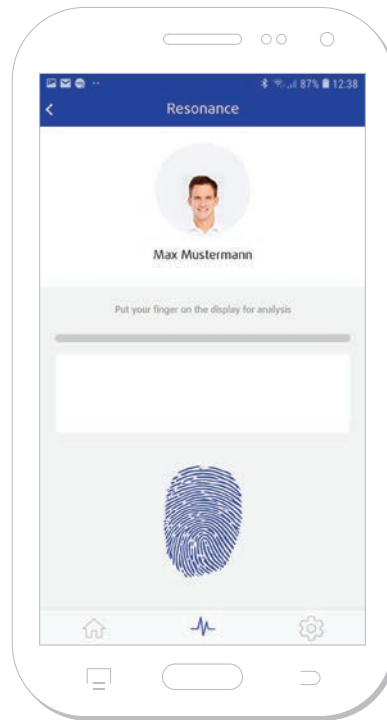

Figure 2.1.6: Resonance Analysis

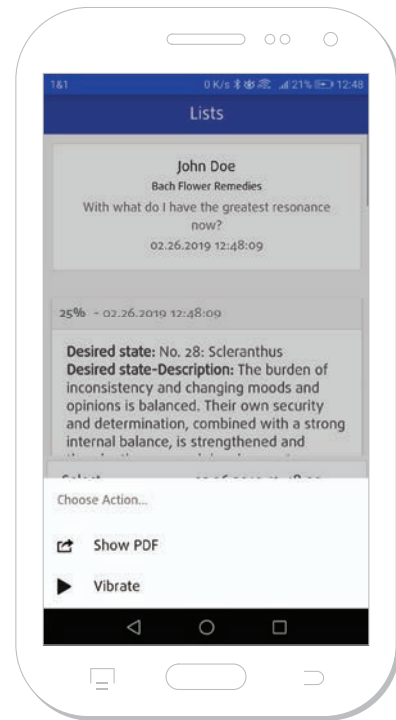

Figure 2.1.7: Resonance analysis list

2.2 Aura Module

To perform an aura analysis, please select an existing client.

If you have decided on a client and no connection to your Healy has been established yet, you will be prompted to establish a connection at this point. Once you have connected to your Healy, you will be returned to the Aura Analysis menu and can continue your analysis.

In the Aura Analysis module you can either take an aura image, see **Figure 2.2.1**, or view the history of previously created aura images, see **Figure 2.2.2**.

Select "Record Aura" and Healy will start with the Aura Analysis, see **Figure 2.2.3**.

At the top right of the screen, next to the circular representation of the recorded aura, you can see two icons, see **Figure 2.2.4**:

With the cloud symbol you can create a PDF with the aura image and the interpretation texts for the 3 most relevant chakras (it is not possible to create a PDF in bar chart view), see **Figure 2.2.5**. With the "X-Icon" in the upper left corner of the PDF preview you can return to the previous view. With the share icon at the top right of the screen, you can forward and share the PDF via various services and channels, see **Figure 2.2.6**.

Using the icon at the top right of the Aura Capture menu, you can switch between the bar chart view and the Aura picture view of the recorded aura, see **Figure 2.2.7**.

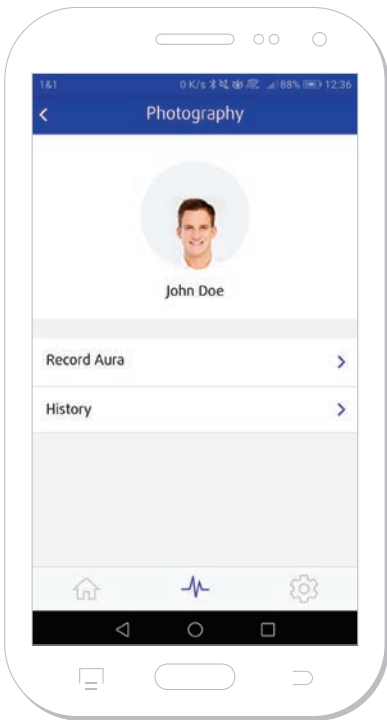

Figure 2.2.1: Create aura image

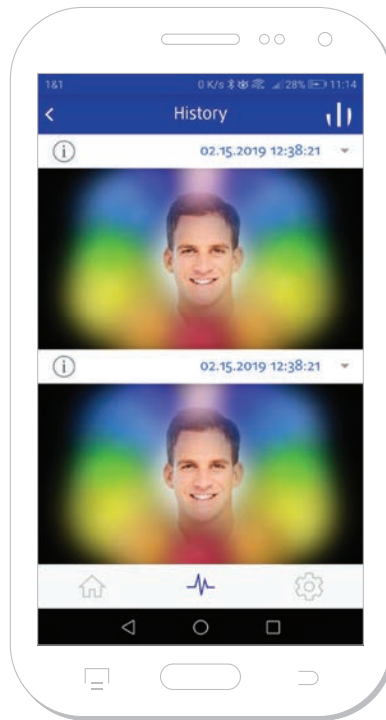

Figure 2.2.2: Comparison of aura images

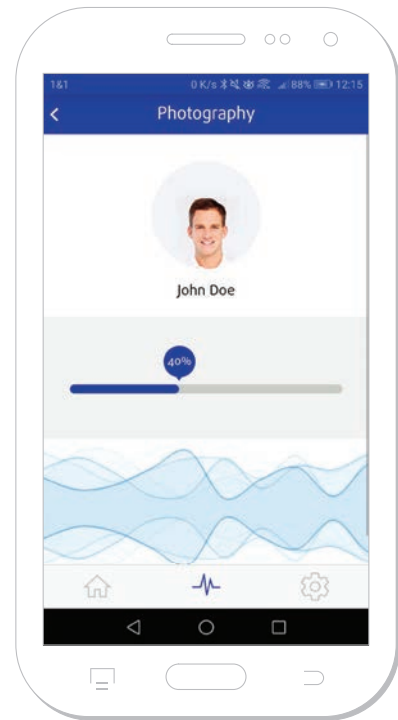

Figure 2.2.3: Aura recording in progress

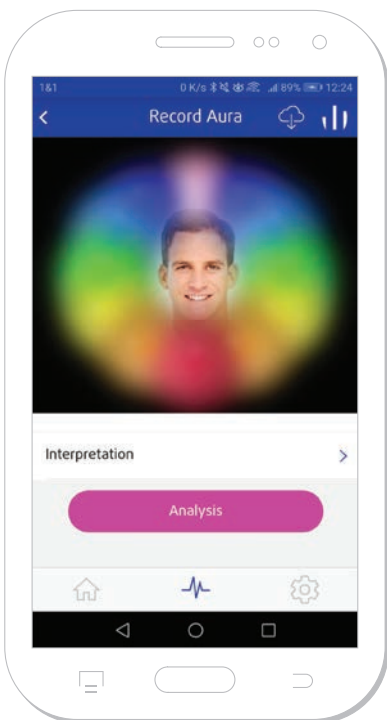

Figure 2.2.4: Aura image created

Figure 2.2.5: Aura image as PDF

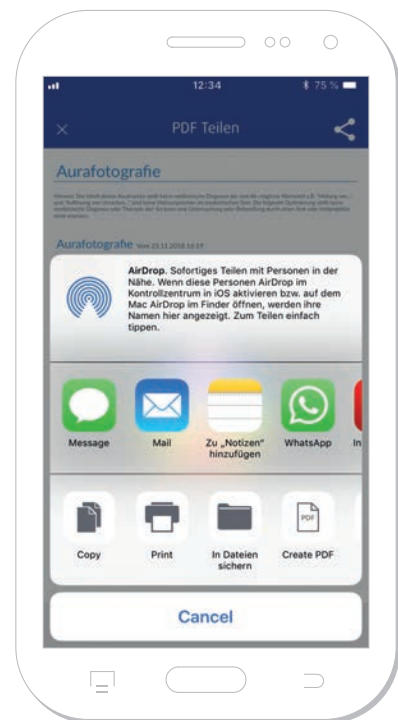

Figure 2.2.6: Forward and share the aura photograph PDF

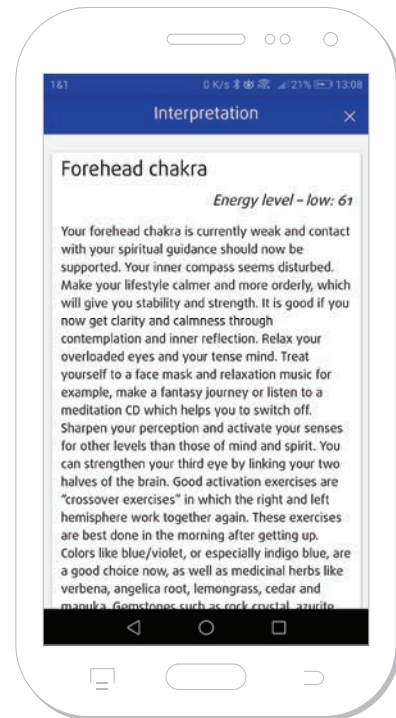

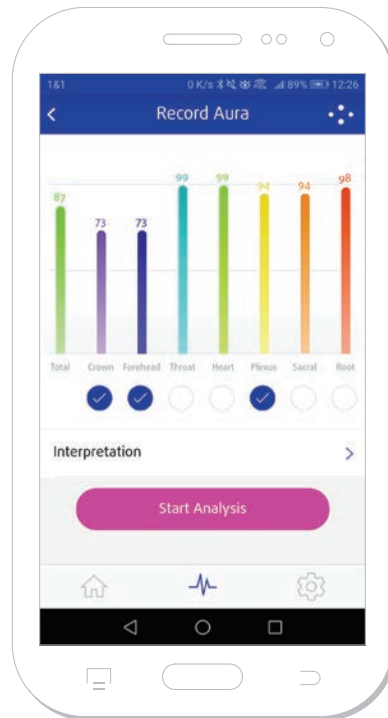

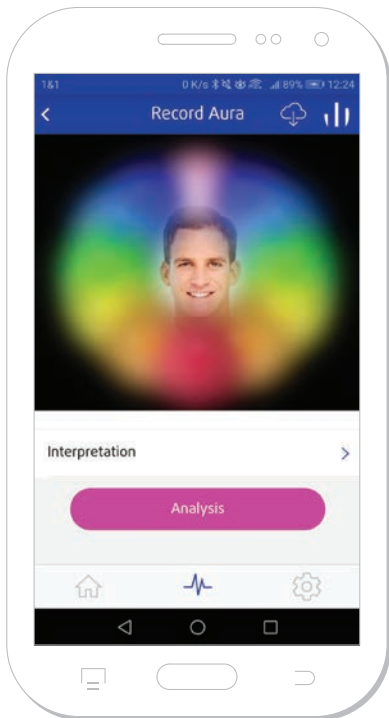

Figure 2.2.7: Different representations of the aura image: Aura image view and bar chart view

Figure 2.2.8: Interpretation texts of the chakras

After you have made the aura recording, you can read the interpretation of the chakras by clicking on “Interpretation”, see Figure 2.2.8. The “X Icon” at the top right of the screen takes you back to the previous view. The interpretation texts always show the three most prominent chakras. If you would like to learn more about the individual chakras, tap on the button “More about the forehead chakra”, for example, see Figure 2.2.9. The chakra interpretation texts contain information structured according to the following topics:

Energy level	Psychic
Objective	Emotional
General	Spiritual
Life topic	Affirmations
Physical	Nature

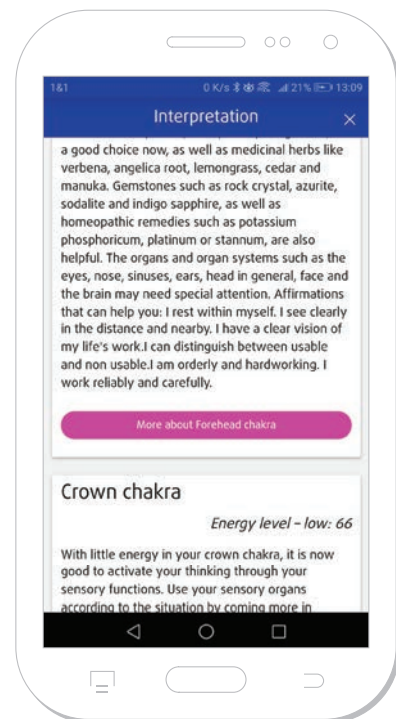

Figure 2.2.9: More details about the chakras

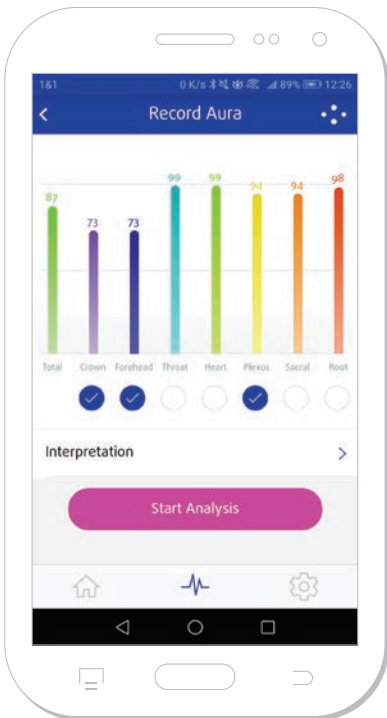

Figure 2.2.10: Analysis of the selected chakras

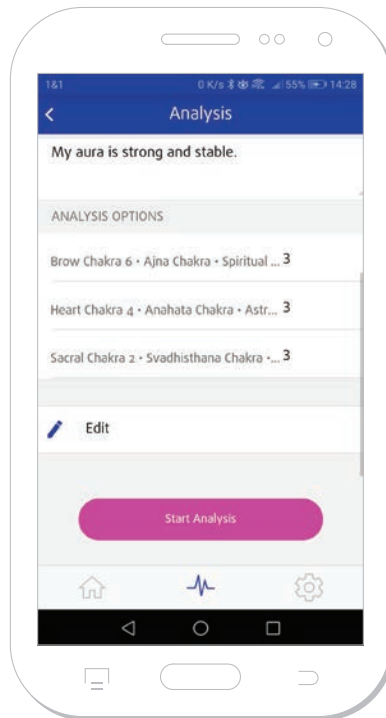

Figure 2.2.11: Analysis of the three most prominent chakras

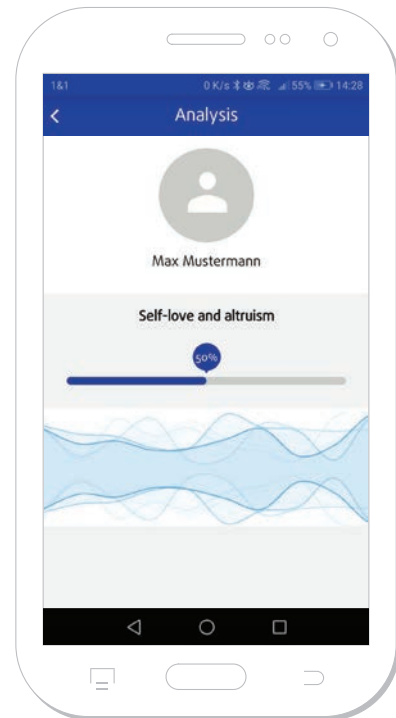

Figure 2.2.12: Start the analysis of the three most prominent chakras

If you want to perform an analysis of the chakras marked with a blue circle, press the button “Start analysis”, see **Figure 2.2.10**. The three lowest chakras are preselected. You can add further chakras to this preselection by tapping the empty white circle fields below the color bars. You can also reduce the selection by tapping the blue circles.

If you press the “Start Analysis” button, the analysis of the three main chakras will be prepared. The focus sentence is predefined as “My aura is strong and stable”, but can be changed as desired, see **Figure 2.2.11**. When formulating the focus sentence, please note that it should be positive and clear and should reflect the objective of your analysis.

You can select “Consider negative relevance” from the analysis menu to get the highest negative relevance in the analysis list, see **Figure 2.2.12**.

Furthermore, you can manually change the number of entries for a chakra by tapping on the automatically defined number of three entries and changing it via the keypad.

After the aura analysis you will be in the list menu and can use the button “Actions” to use further options, see **Figure 2.2.13**:

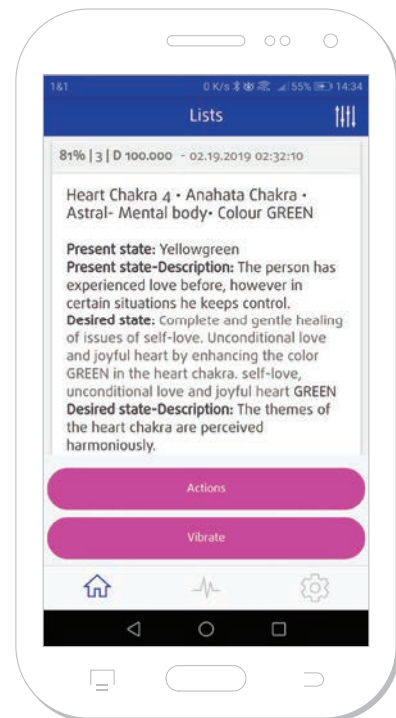

Figure 2.2.13: Aura Analysis list

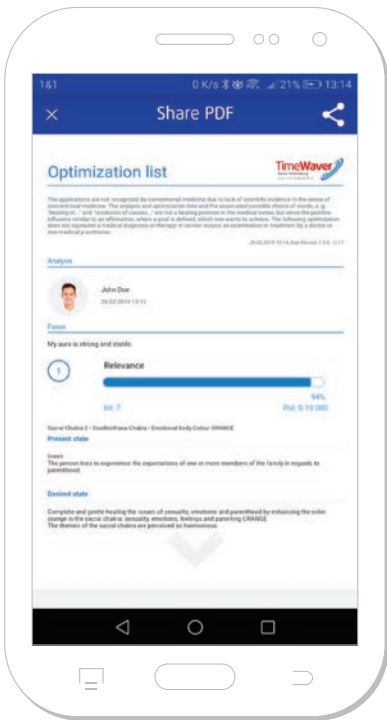

Figure 2.2.14: PDF Aura Photography analysis list

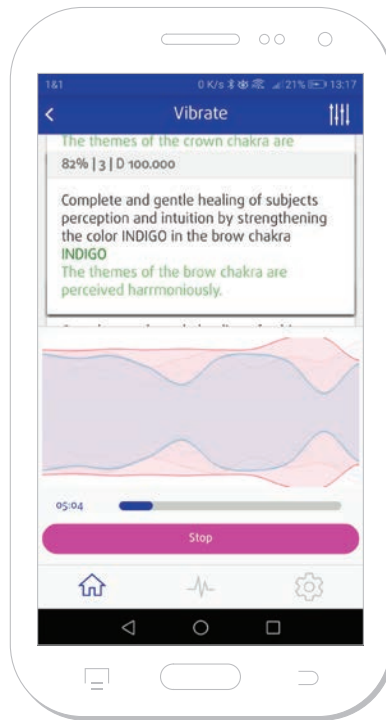

Figure 2.2.15: Vibrating after the aura analysis

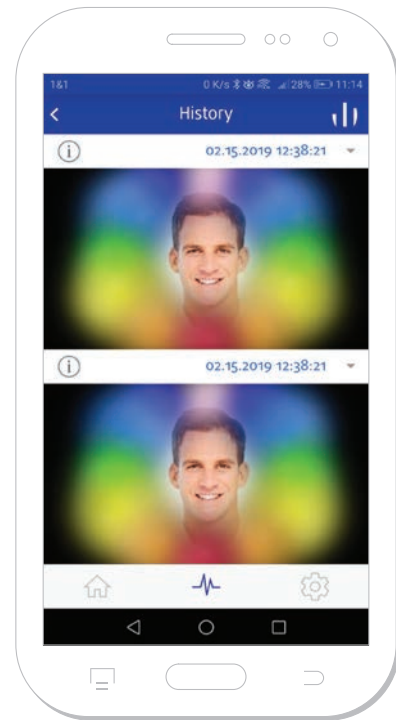

Figure 2.2.16: Aura analysis history

- Add additional list entries manually
- Display list as PDF, see **Figure 2.2.14**

Or you can use the button “Vibrate” to directly vibrate the aura analysis list, see **Figure 2.2.15**.

A list entry and individual items of the list entry can be edited, added to or deleted using the “Pen icon” and the red “X icon” before they are displayed, see **Figure 2.2.13**.

Previously created aura images are sorted chronologically by date of creation in the history under the Aura Analysis menu, see **Figure 2.2.16**.

If you have just taken an aura picture or have decided to use an aura picture from the history, you can then use the small circular “(i)-icon” (top left) to look at the interpretation of the aura picture or switch between the aura picture view and the bar chart display of the aura (top right icon), see **Figure 2.2.17**.

Figure 2.2.17: Bar chart display Aura analysis history

2.3 Coach Module

With the help of the Coaching Analyse module (see **Figure 2.3.1**) you can perform for all persons you have created in the Information Field and thereby perform a holistic coaching with yourself and your clients. In this way you have the possibility to fast and uncomplicatedly solution-oriented information patterns for the topic you are currently focusing on.

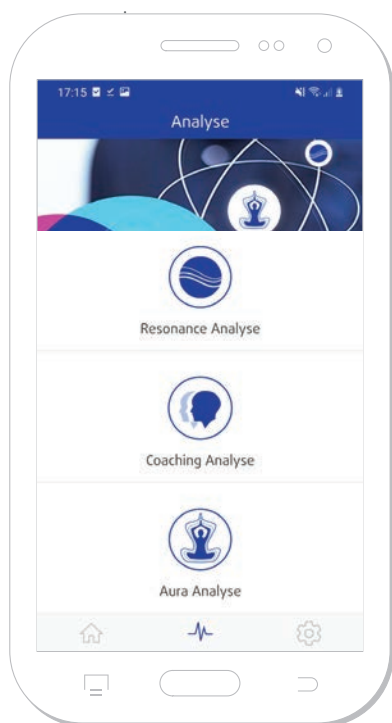

Figure 2.3.1: Overview Analyse Module

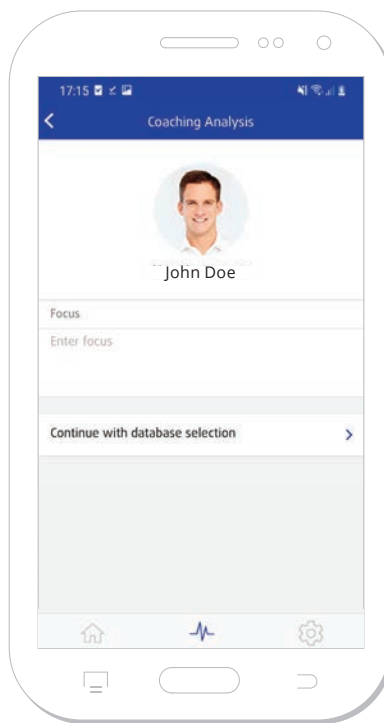

Figure 2.3.2: Selection Clients

For the analysis you have to be connected to the Healy. Please select an existing client first, see **Figure 2.3.2**.

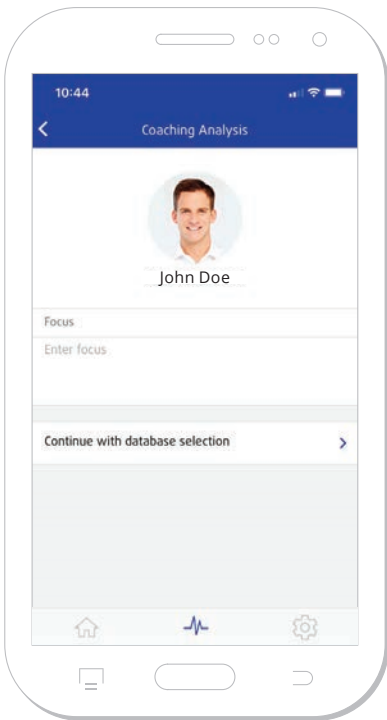

Figure 2.3.3: Text defining your focus

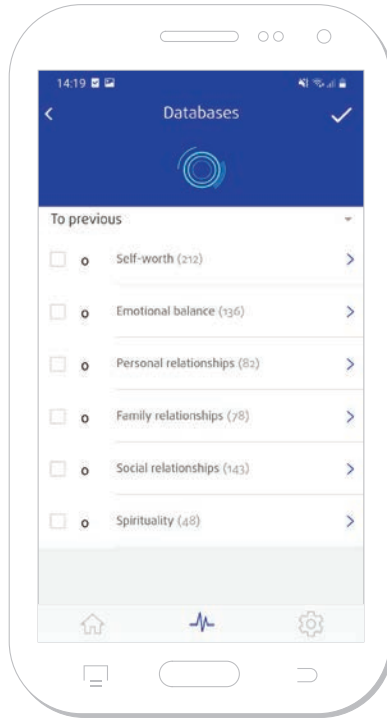

Figure 2.3.4: Personal Coach area

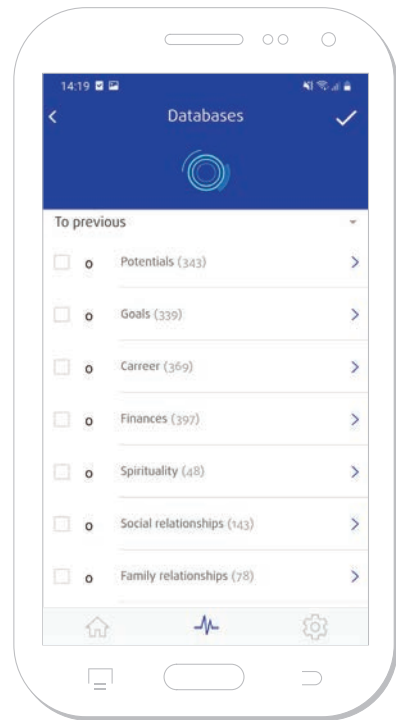

Figure 2.3.5: Success Coach area

Now define a clear focus sentence for your analysis. This should reflect the goal of your analysis and be formulated positively, see **Figure 2.3.3**. By clicking on "Continue with database selection" you will get to the topic areas, see **Figure 2.3.4** and **Figure 2.3.5**. Select the appropriate area, the arrow on the right will take you to the databases contained therein, see **Figure 2.3.6**. Now define the number of entries to be determined per database, see **Figure 2.3.7**. By tapping the checkbox icon in the upper right corner you confirm the selection you have made and start the analysis by clicking the pink button, see **Figure 2.3.8**.

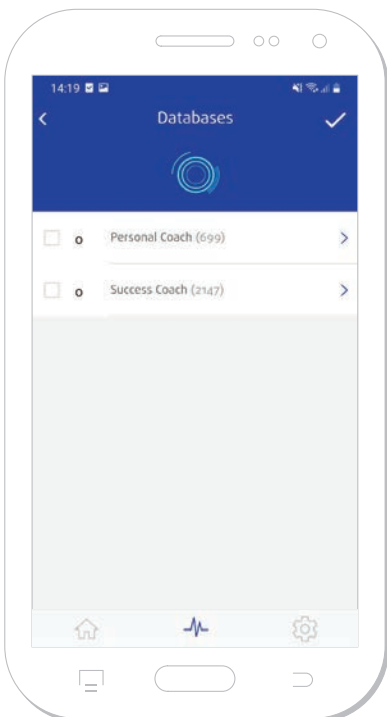

Figure 2.3.6: Partnership

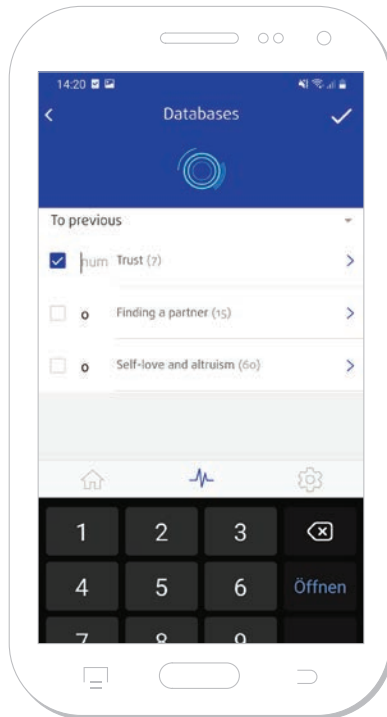

Figure 2.3.7: Selection Number DB

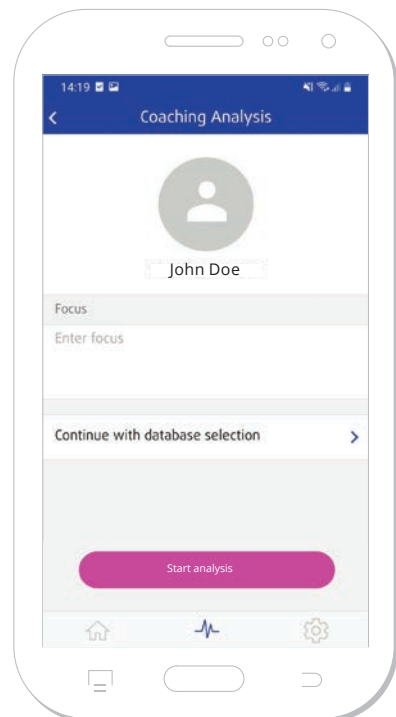

Figure 2.3.8: Overview Selection

3 Settings Menu

In the Settings menu you will find the following menus: Switch Language, Cloud Settings, Infos, Connect to Healy, Healy website, Contact, Manual, Instructions for use, see **Figure 3.1**.

3.1 Switch Language

In the menu item “Switch language” you can choose your language, see **Figure 3.1.1**.

3.2 Cloud Settings

In the Cloud Settings menu, you can make all the settings related to your Cloud account, authorize additional devices, and customize the synchronization settings. You can use this account for all future online services.

3.2.1 Logout

With “Log out” you can log out of your Cloud account and log in again with another account.

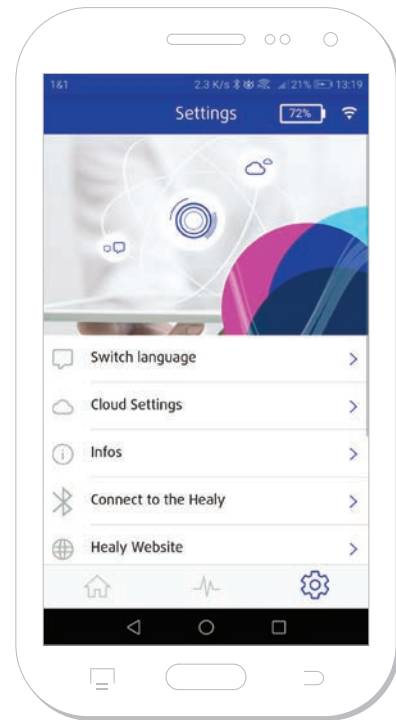

Figure 3.1: Settings menu

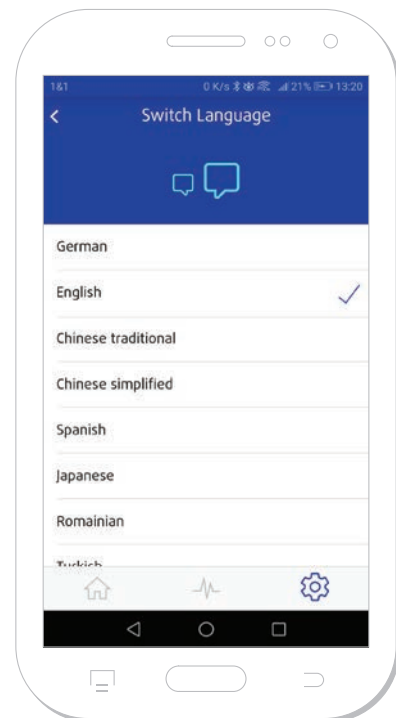

Figure 3.1.1: Switch language

3.2.2 Edit Cloud Account Profile

You can edit your profile with the “pencil icon”, see **Figure 3.2.2**.

3.2.3 Change the Cloud Account Password

You can change the password of your Cloud account in the “Change password” section.

3.2.4 Authorize Additional Devices

When you install the app and log in to your account (e.g. from another device), a verification code is sent via email.

To access your account, you need to verify yourself. This happens by a code that is sent to your account email address.

The code must be entered within 10 minutes, then the stored data will be accessible.

Follow the instructions in the app, the steps are explained there.

The code can be entered incorrectly 3 times before the message to request a new one will appear. If the code 10 was requested, the user will be blocked for a few hours (24h starting with the first code).

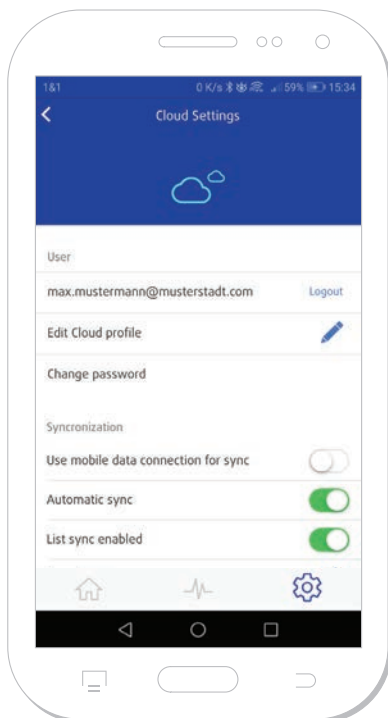

Figure 3.2.2: User Cloud Menu

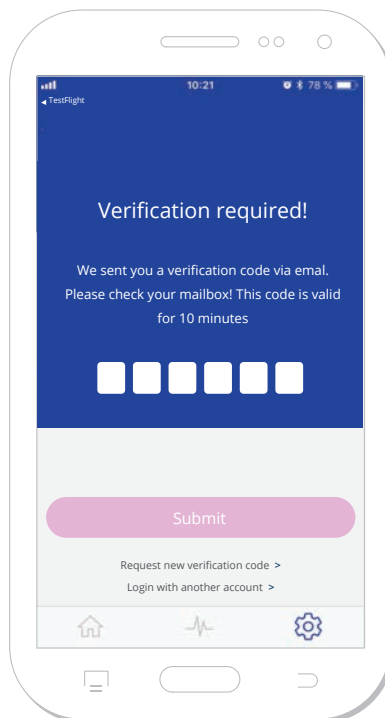

Figure 3.2.3: Enter the verification code to access the data.

3.2.6 Synchronization Settings

You can enable mobile data usage (with your SIM card) to be also used for synchronization by enabling the menu item “Use mobile data connection for sync”, see **Figure 3.2.6.1**.

“Automatic Sync” allows you to automatically synchronize the data between the Analyse App and Cloud if an Internet connection is available.

“Lists Sync enabled” automatically synchronizes the analysis lists of the clients.

“Synchronize changes” synchronize the currently generated data to or from the Cloud.

“Full synchronization” restores all data from the Cloud.

Note: We recommend a stable and fast WiFi connection for synchronization, as the databases are several hundred megabytes in size.

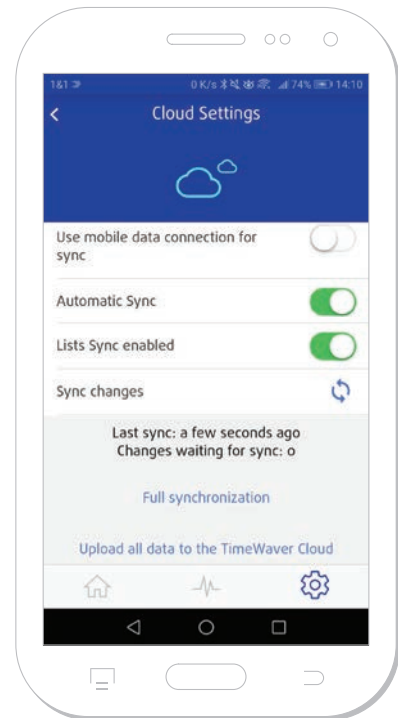

Figure 3.2.6.1: Synchronize the Healy App

3.3 Infos

Under “Infos” you will find your HealAdvisor Analyse App version, hardware information about your Healy, as well as the privacy policy and the imprint, see **Figure 3.3.1**.

3.4 Connect to Healy

With “Connect to Healy” the connection between the app and the Healy hardware can be established via Bluetooth. It searches for Bluetooth devices in the vicinity and if a device is found, it is displayed with the serial number (example: 01:01:01:01:01:4B). If you tap on the information icon (i) on the right, the HealAdvisor Analyse App connects with your Healy, see **Figure 3.4.1**.

3.5 Healy Website

The “Healy Website” button takes you to the Healy website, see **Figure 3.5.1**

Here you will find the latest information about Healy.

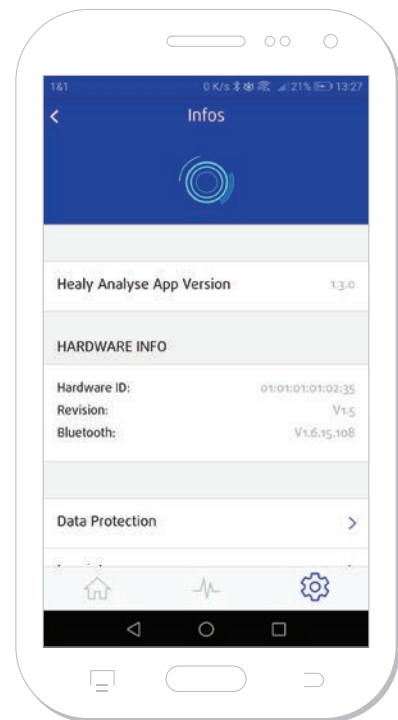

Figure 3.3.1: Hardware information about the Healy App

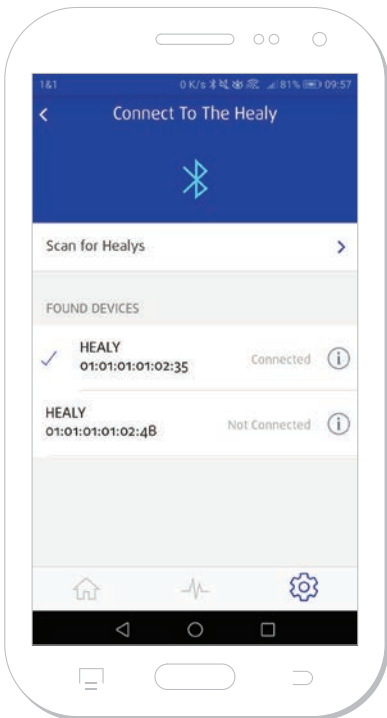

Figure 3.4.1: Connect to Healy

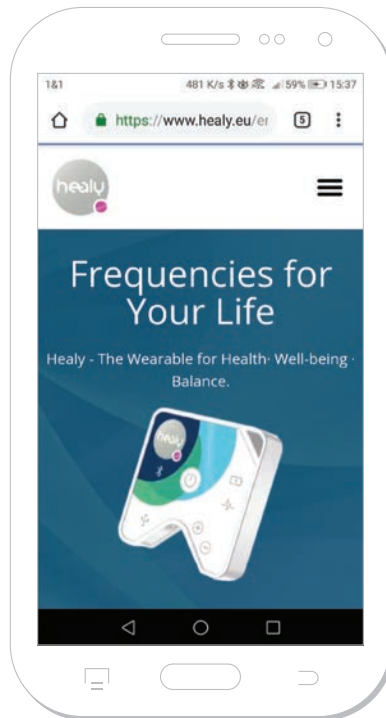

Figure 3.5.1: Healy website

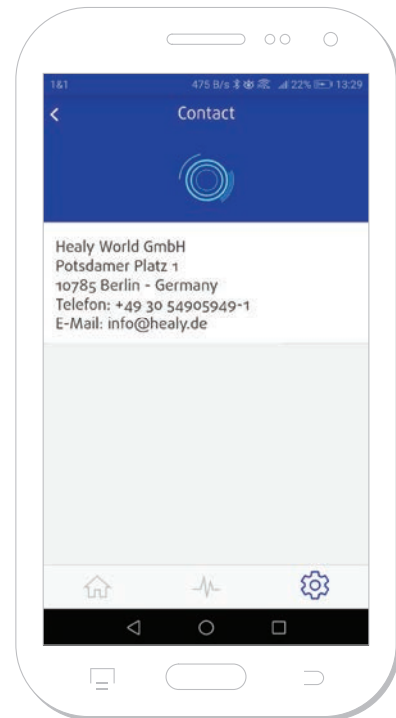

Figure 3.6.1: Healy contact details

3.6 Contact

Here you will find the contact details, which you can use to contact our team at any time, see **Figure 3.6.1**.

3.7 Manual

Here you find the link to the latest manual of the HealAdvisor Analyse App see **Figure 3.7.1**.

3.8 Training Videos and Release Notes

The menu item "Training Videos" will take you to our Vimeo page where you can watch videos about the app. Here you can also find information about all releases of the app.

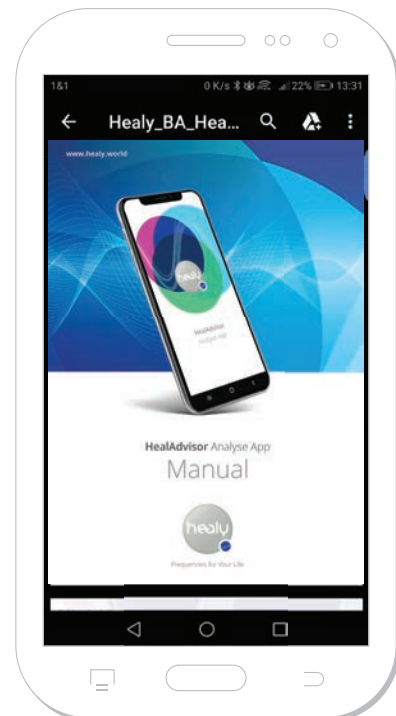

Figure 3.7.1: Online HealAdvisor Analyse manual

4 Notes

4.1 Disclaimer

Please see the disclaimer that appears at the beginning of the HealAdvisor Analyse App whenever you start the HealAdvisor Analyse App: Healy provides personalized information that can help users understand how to improve their level of wellbeing, vitality and awareness. Healy information should not be the only information relied on to make legal, business, medical or personal relationship decisions, and the manufacturer specifically disclaims any responsibility for user actions based on Healy information.

4.2 Parallel Use of Healy Apps

Healy can be used with the Healy App or the HealAdvisor Analyse App. Please note that both apps cannot be used simultaneously with the Healy. As soon as the HealAdvisor Analyse App is sent to the background, the Bluetooth connection may be interrupted and the Healy may have to be reconnected.

4.3 Permissions for Smartphone Functions

In order to be able to use all functions of the HealAdvisor Analyse App or to connect your Healy, you are asked at different places in the HealAdvisor Analyse App to grant the app access to photos, media and files on your smartphone or access to the location of your smartphone and Bluetooth permissions, see **Figure 4.3.1** to **Figure 4.3.4**. In order to use the respective functions, it is necessary to allow the requested accesses.
